OHIO DEPARTMENT OF HIGHWAY SAFETY

JAMES A. RHODES
GOVERNOR

EARL H. REICH
DIRECTOR

State Highway Patrol | Bureau of Motor Vehicles

To the Citizens of Ohio:

With overall traffic deaths continuing to rise at an alarming rate the Department of Highway Safety is redoubling its efforts to reduce highway slaughter. The 1979 fatality figures of 2,281 is the state's highest annual death toll since 1973 as well as being an 11 percent increase over last year.

It's a tragic fact that more Ohioans between the ages of one and 40 died in traffic accidents last year than from any other single cause. Even more tragic are the statistics that show 80 percent of those fatal accidents were caused by some avoidable driver error.

The purpose of "Accident Facts" is to analyze the cause of last year's traffic crashes and to provide interested citizens and law enforcement agencies across the state with the facts they need to plan and execute effective accident prevention measures.

We cannot let the terrible waste of human lives continue. If all Ohio drivers make a conscious effort to obey the laws and "watch out for the other guy" our highway death toll could be drastically reduced starting today.

With your support, we can and will achieve the goal of safe, convenient travel for all those who use Ohio's highways.

Very truly yours,

Earl H. Reich
Director
Department of Highway Safety

240 Parsons Avenue / P.O. Box 7167 / Columbus, Ohio 43205 / 614-466-2550

To the Citizens of Ohio:

Following several years of alarmingly increased highway death tolls, I am proud to report that Ohio drivers dramatically improved their safety performance in 1980. While the loss of life and property damage were still terrible, 1980 saw an 11 percent reduction in accident fatalities from 2,281 in 1979 to 2,033 last year.

This accomplishment is even more impressive when compared with national highway crash figures--which show that overall traffic deaths increased by about one percent nationwide during 1980.

This "Accident Facts" booklet has been prepared to provide extensive background material for law enforcement agencies, traffic engineers, educators and other concerned citizens. By furnishing reliable data on Ohio's 1980 accident experience, it is hoped that this publication will facilitate more effective planning and execution of crash reduction programs in the future.

We cannot allow ourselves to be satisfied with a short-term positive trend. Despite a strong safety performance, Ohio still lost more than 2,000 of its citizens in 1980 traffic accidents. The long struggle to combat the causes of highway death--like speed, alcohol-impaired driving, failure to use safety restraints and simple carelessness--must continue.

I am confident that the gains of the recent past can be consolidated and improved upon, if each of us accepts the fact that responsible driving is literally a matter of life and death.

Very truly yours,

Earl H. Reich
Director
Department of Highway Safety
